Make your own "Paper" Fortune Cookie!

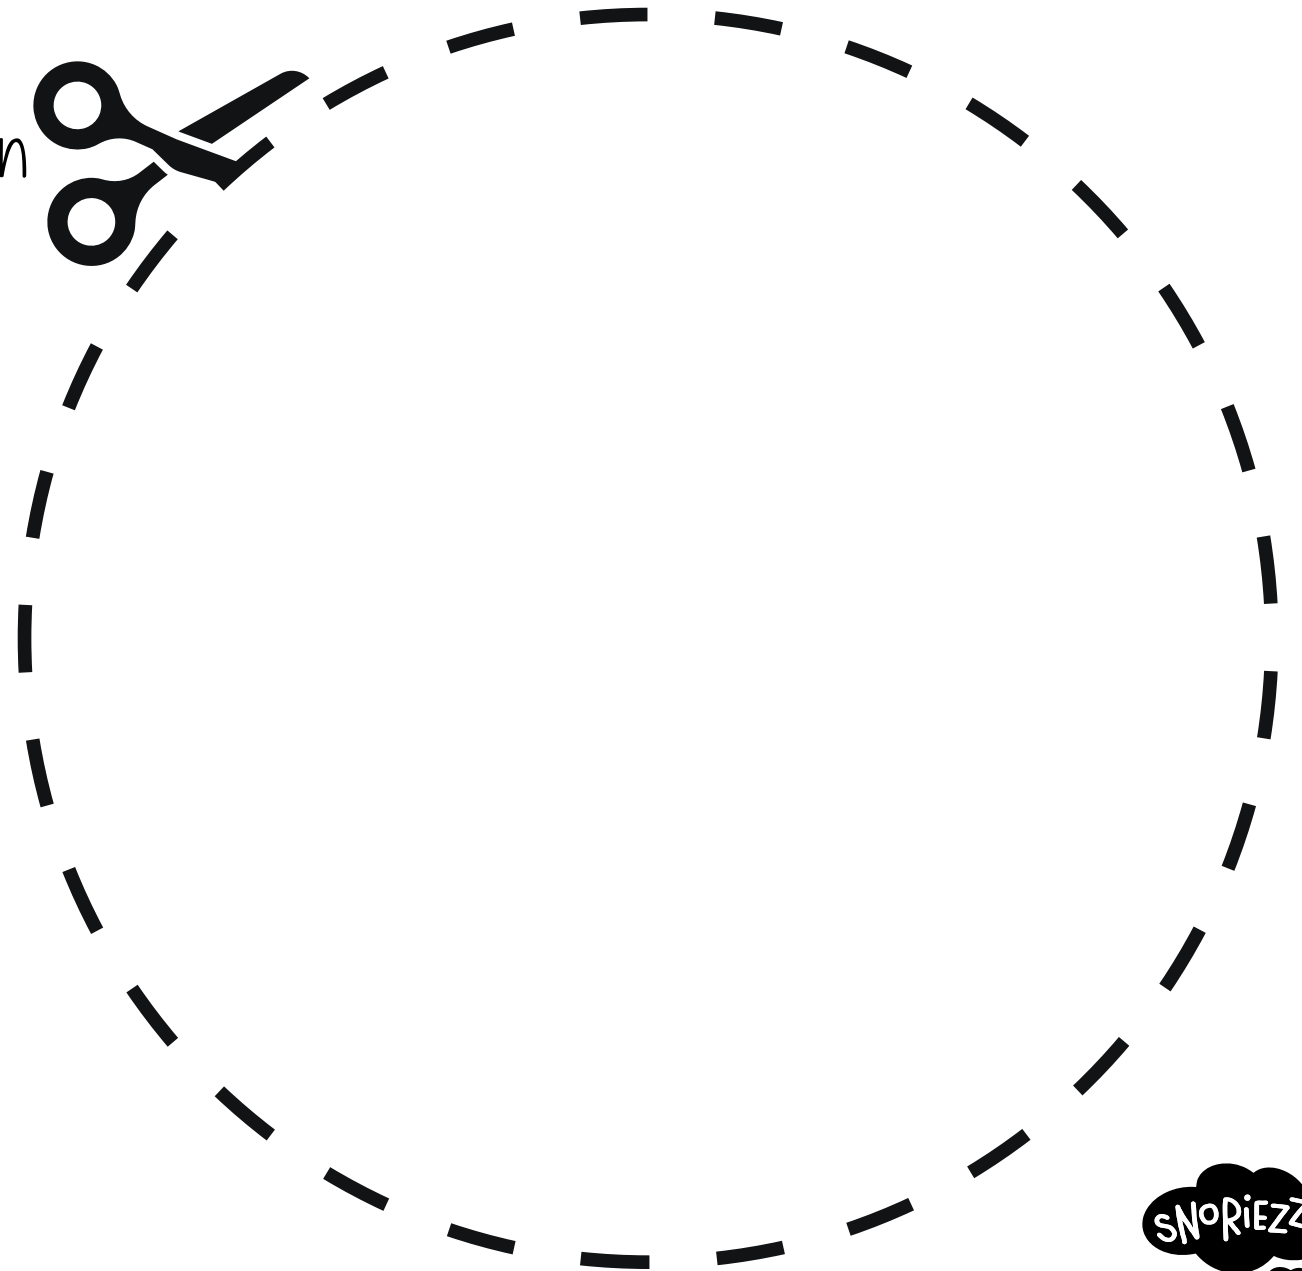

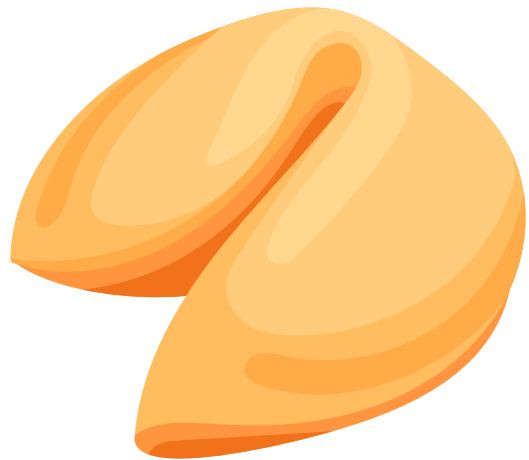

Once you have picked out your pattern

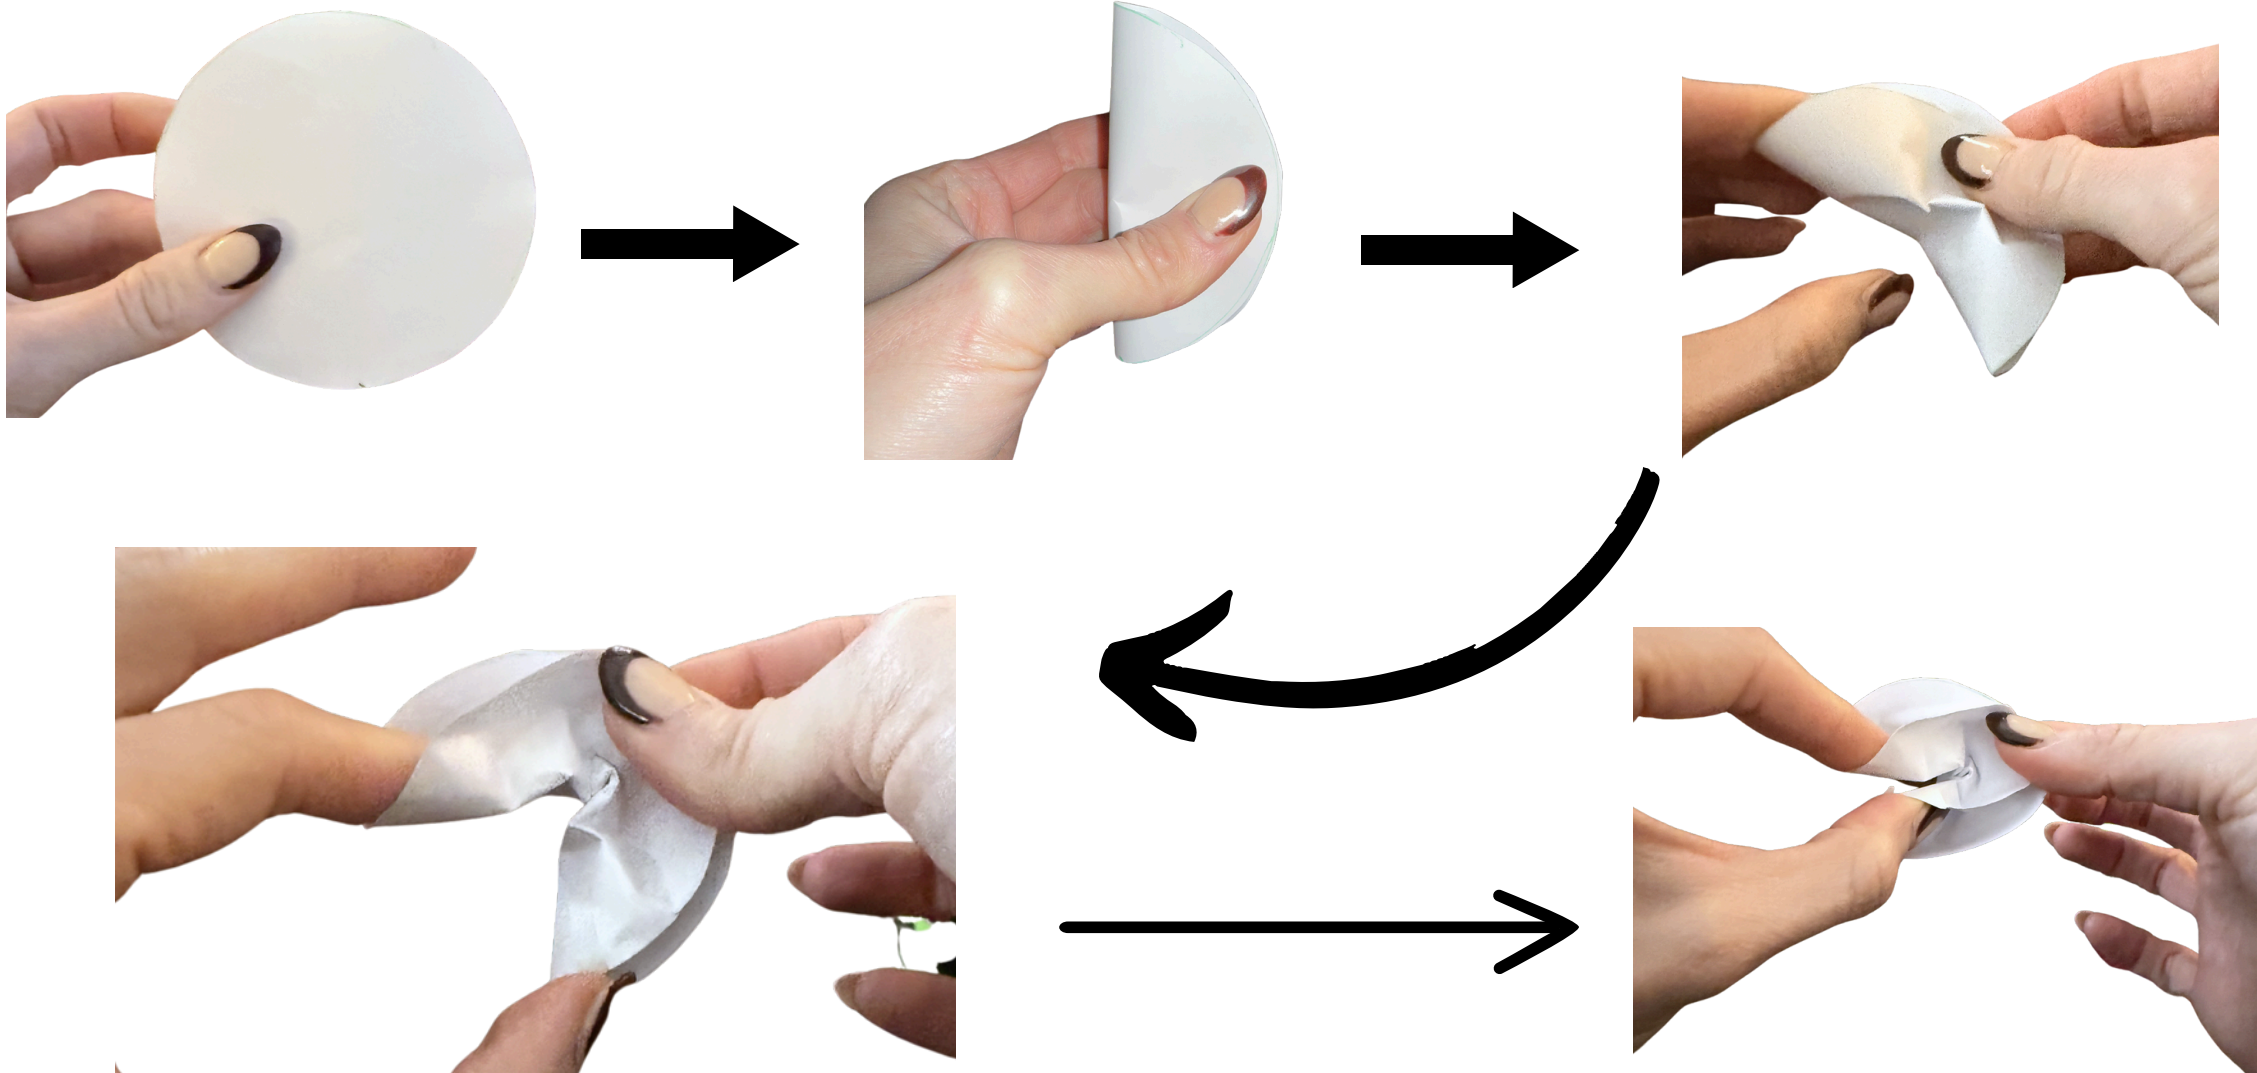

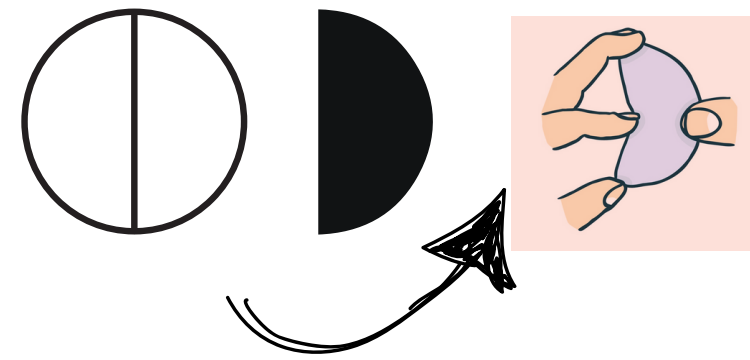

Print out the circle. Note: you could also print and cut a blank circle and decorate it on your own!

Once printed, cut out the circle

- Once you have your circle cut out,
- Fold the circle in half, but don't crease it!!
- While holding your folded circle push the side in like the picture below

It should now look like this!

Don't worry if it looks messy on the bottom

Then get your glue or tape and glue the two sides of your folded/bent circle together. We used tape!

Next, get your paperclip (if you want) and extra secure your paper fortune (where you just taped/glued)!

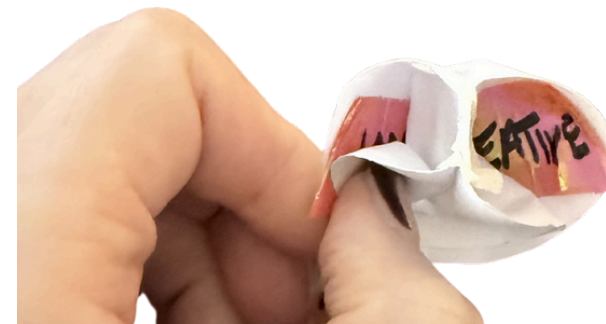

Now write a fortune or a kind note, we decorated ours with shiny tape! Then turn over your paper fortune cookie and slip the fortune it into the back (it is open and you are able to slip in the fortune). Then give it to a friend, family member or keep it for yourself!

Now turn the paper fortune cookie back over and your fortune may hang out a bit making it easy to pull!

You can slip it into the back here!

Happy Paper Fortune Cookie Crafting!
